

Dicas para usar o blue Crystal

Properties

O sistema precisa de um arquivo de propriedades disponível na raiz do classpath.

```
FSRepoLoader.certFolder=<pasta onde ficarão as AC Raiz e intermediaria>
```

```
RepoLoader.loaderType=bluecrystal.service.loader.FSRepoLoader
```

```
CryptoService.validateCert=true (utilize false em ambientes de testes com certificados que não tem hierarquia valida)
```

Criando os clientes Java para acesso ao serviço

```
"C:\Program Files\Java\jdk1.6.0_45\bin\wsimport" -keep  
http://localhost:8080/bluecrystal.ws.tc_1/serv/icpbr_1?wsdl
```

```
"C:\Program Files\Java\jdk1.6.0_45\bin\wsimport" -keep  
http://localhost:8080/bluecrystal.ws.tc_1/serv/rebuild_1?wsdl
```

```
"C:\Program Files\Java\jdk1.7.0_60\bin\wsimport" -keep  
http://localhost:8080/bluecrystal.ws.tc_1/serv/icpbr_1?wsdl
```

```
"C:\Program Files\Java\jdk1.7.0_60\bin\wsimport" -keep  
http://localhost:8080/bluecrystal.ws.tc_1/serv/rebuild_1?wsdl
```

```
"C:\Program Files\Java\jdk1.8.0_25\bin\wsimport" -keep  
http://localhost:8080/bluecrystal.ws.tc\_1/serv/icpbr\_1?wsdl
```

```
"C:\Program Files\Java\jdk1.7.0_60\bin\wsimport" -keep  
http://localhost:8080/bluecrystal.ws.tc_1/serv/rebuild_1?wsdl
```
